

Taoufik Amrani

Fontenay-aux-Roses, France | taoufikamrani04@gmail.com | +33 7 67 37 33 73 | LinkedIn: @taoufik-amrani

Profile

Engineering student at ISEP Paris specializing in cybersecurity, Business Intelligence (BI), software development, and AI. Hands-on experience in full-stack development, embedded systems, network security, data visualization, and NLP. Seeking an internship to contribute to an international team.

Core Skills

- **Programming:** Python, JavaScript, Java, PHP, SQL, CSS, HTML
- **Cybersecurity & Data:** ZAP, Wireshark, Power BI, DBEaver, Oracle VirtualBox – NLP, TF-IDF, Word2Vec, BERT, SVM, Random Forest, KNN
- **Tools:** IntelliJ, Visual Studio, Arduino, Matlab-Simulink, SolidWorks
- **Languages:** French (Native), Arabic (Native), English (B1 – TOEIC 630/990), Spanish (A2)
- **Soft Skills:** Adaptability, Communication, Stress management, Team spirit, Rigorous

Education

IT Engineering Degree (5-year program)

ISEP, Paris, France

2024 – 2027

Expected graduation: 2027

- Specialization: Cybersecurity & Business Intelligence (BI) – Coursework: Software Dev, AI, Databases, Networks

TSI Preparatory Class

Jules Ferry, Cannes, France

2022 – 2024

- Intensive 2-year program in technology, industrial sciences, and mathematics

Projects

AI-Generated Text Detection (NLP & Machine Learning)

2026

ISEP, Paris

- Binary classifier (human vs AI text) using TF-IDF, Word2Vec, BERT embeddings and ML models: SVM, Random Forest, KNN
- Visualized results with PCA, t-SNE and confusion matrices – Tools: Python, Scikit-learn, Gensim

Consumer Financial Complaints – Business Intelligence Analysis

Feb 2026 – Jun 2026

ISEP, Paris

- Analyzed 62,516 US consumer financial complaints across 9 product categories and 1,081 financial companies
- Designed a star schema data warehouse model (Fact + Dimensions: Product, Location, Time, Company) in Power BI
- Built KPIs using DAX: Timely Response Rate, Avg Response Time, Complaints per Market Share
- Developed EDA visualizations: geographic maps, treemaps, time series (MoM & YoY) – Tools: Power BI, DAX, Excel, DBEaver

Web Vulnerability Scanner – Cybersecurity Tool Development

2026

Personal Project

- Python/Flask scanner: crawler plus checks for missing headers, insecure cookies, reflected XSS and SQL injection
- AI-generated summaries and chat via Claude API to explain and prioritize findings – Tools: Python, Flask, Anthropic API

AI Travel Planner Agent – Full-Stack AI Agent Development

2026

Personal Project

- Autonomous AI agent using Claude's web-search tool for real weather, prices and attractions to build budget-aware itineraries
- Flask app with an interactive 3D globe (Three.js/globe.gl) for destination search – Tools: Python, Flask, Anthropic API, JS

Link Checker Mobile App – React Native Development

2026

Personal Project

- Cross-platform app detecting malicious URLs via Google Safe Browsing API and custom heuristics (shorteners, IP URLs, keywords)
- Tools: React Native, Expo, TypeScript, Google Safe Browsing API

Link Checker Browser Extension – Chrome Extension Development

2026

Personal Project

- Chrome extension (Manifest V3) exposing the same detection engine via popup and right-click menu, with real-time alerts
- Tools: JavaScript, Chrome Extension APIs, Google Safe Browsing API

Schedule Management System – Java Development

Mar – May 2025

ISEP, Paris

- Java desktop app for 3 user roles (Admin, Teacher, Student) with role-based access control
- Layered MVC: JavaFX UI, Service layer, DAO/SQLite – conflict detection, PDF export, statistics dashboard
- Tools: Java 23, JavaFX, SQLite, Maven, IntelliJ

Accelerometer Sensor – Electronics Project (TIPE)

2023 – 2024

Jules Ferry, Cannes

- Arduino + Python sensor programming, Matlab data analysis, Bluetooth module circuit assembly

Professional Experience

Versatile Team Member – McDonald's, Frejus

Jul 2022 – Aug 2022

- Order preparation, table service, and workspace maintenance

Interests

Football | Video Games | Chess | Manga
